Sir:

Attached is a completed Form PTO/SB/08(A&B) and copies of the pertinent parts of the references cited thereon. Following are comments on any non-English-language references pursuant to Rule 98:

Meicheng shows a transparent dual-sided photo. The method described in the patent requires a layer of transparent adhesive that is sandwiched between two transparent objects. Inside the layer of transparent adhesive are two overlapped image photos.

This invention has not really created a two-sided image, but rather has created a method for viewing two separate images that have been joined by an adhesive layer. Furthermore, it does not describe how to create congruent front and back images.

Very respectfully,

Applicant(s):
